PROFESSIONAL SUMMARY

IT Support Engineer with 1 year 3 months of hands-on experience maintaining and troubleshooting enterprise hardware, software, and network environments within SLA-driven service standards. Proficient in Python, JavaScript, and SQL, with practical expertise in Linux administration, Docker containerization, and cloud platforms (AWS and Azure). Known for diagnosing complex technical issues quickly, minimizing downtime, and collaborating effectively across technical teams. Now targeting a Web Development, Cloud, or DevOps Support role to apply this infrastructure and programming background to building and maintaining scalable, production-grade applications.

CORE COMPETENCIES

- Technical Support & Troubleshooting | Video Conferencing (VC) Support | OS Installation & Configuration
- Cloud Computing (AWS, Azure) | Linux Administration | Docker & Containerization
- Python & JavaScript Development | SQL & Database Support | SLA & Incident Management

SKILLS

- Programming: Python, JavaScript, SQL
- Cloud Computing: AWS, Microsoft Azure
- Operating Systems & Tools: Linux, Docker
- Web: Front-end Development, UI/UX Design
- IT Support: Video Conferencing (VC) support, OS installation & configuration, hardware/software troubleshooting, network diagnostics, SLA-based ticket management

WORK EXPERIENCE

IT Support Engineer | Data Patterns (India) Ltd | April 2025 - Present

- Provided Video Conferencing (VC) support, ensuring smooth setup and operation of VC systems for meetings and organizational communication.
- Diagnosed and resolved hardware, software, and network issues across the organization, ensuring minimal downtime and consistent IT service delivery.
- Troubleshoot OS installation and configuration issues, installing, configuring, and maintaining operating systems, applications, and user accounts on Linux and Windows environments to improve system reliability and performance.
- Consistently met SLA targets by prioritizing and resolving technical service requests, coordinating with cross-functional teams to close complex issues efficiently.
- Leveraged Docker for containerized application support and deployed test environments on AWS and Azure to strengthen cloud infrastructure skills.

PROJECTS

Dine With Us - Reserve Your Seat | Final Semester Capstone Project (Team of 4) |

- Designed and developed a full-stack, web-based restaurant table booking application, implementing secure user authentication, real-time table management, and an admin approval workflow.
- Collaborated in a 4-member Agile team through the full development lifecycle - requirements, design, development, and testing - delivering a functional reservation system that streamlined the booking process end to end.

EDUCATION

- BCA - SRM Institute of Science and Technology, Kattankulathur | 2022 - 2025 | CGPA: 8.44
- HSC - CMS Govt. Higher Secondary School, Kanchipuram | 2021 - 2022 | 74%
- SSLC - Meenakshi Ammal Matric Hr. Sec. School, Uthiramerur | 2019 - 2020 | 75%
